

Hello good hearted people! Great grandpa Will here with some revolutionary information to share with those who understand we are on the launching pad of a new global paradigm in learning, teaching and healing.

What if - by using Quantum Reality - **Virtual Reality Games** - we are able to time travel into the past or future to experience a different understanding or perspective on a specific event or process?

What if - the 5 Tees, Time Travel, Telekinesis, Telepathy and Teleportation are the emerging technologies accessible with **Virtual Reality Games**?

What if - with Virtual Reality Games - we could acquire a new skill-set or ability by the simple process of "remembering" the past or future lifetime when we already possess that skill-set or ability?

What if - with Virtual Reality Games - we have a means, a technology if you will, that allows us to learn any skill, upgrade our belief system, increase our level of knowledge and awareness, our worldview or mindset - **to actually raise our level of consciousness?**

This is the future of **Experiential Learning Games**, where we learn by experiencing different aspects of Quantum Reality, where we leave behind the construct of Linear Time and enter the Quantum Physical paradigm of Infinite Past and Future existing simultaneously.

This is a revolutionary method of teaching and learning any skill, capability, viewpoint, belief system, perspective or understanding!
