Will Barkley here. I want to connect and communicate with people interested in forming a global support team (network?) for FFLC (Freedom Farms Learning Centers). Naturally these people and I would share a similar perspective on life (mindset/worldview?).

So here is my proposed curriculum and subjects for seminars, research and teaching at FFLC. If this information resonates with you then you can probably connect the dots to see the evolving paradigm. My vision is that Freedom Farms Learning Centers will function as catalysts (midwives) in manifesting this globally evolving paradigm long after I have left this dimension.

**Human Heart-Cosmic Heart**
**Page 119: "Finally, maybe most importantly, shed as many of your beliefs as possible, including those so-called cherished ones. Be wary of believing in any institutions or abstractions (ie, nations, patriotism, capitalism). Ask yourself what you know to be true in your heart versus what you've been told. Only knowing comes from your heart. When you have done enough of this shedding that it has become a habit, turn around in line once in a while and see who and what is there. If who or what moves your heart (you'll know) stop at nothing to make this who or what a part of your life.**

**If this information resonates with you then you can probably connect the dots to see the evolving paradigm. My vision is that Freedom Farms Learning Centers (FFLC) will function as catalysts (midwives?) in manifesting this global paradigm long after I have left this dimension. I believe most nucleators for Freedom Farms Learning Centers will be alternative healthcare providers (body workers), home schoolers, animal interest activists and animal communicators. If you would like to be affiliated with this catalytic global network then,**
